**Room Profile**

Huddle Room

Huddle Rooms have been a popular trend in recent years for corporate meeting spaces. A Huddle Room is a small room, typically that seats 2-4 people, equipped with a monitor, small table, keyboard, and audio-conferencing device. The Spider is a great edition for these rooms, because it can be placed on the table, or even mounted on the ceiling.

In the first rendering, we created a room that seats 3 people and utilizes the MT505 Spider Speakerphone.
In the second rendering, the room uses the MT600 Condor Microphone Array and a soundbar. This room is perfect for informal conversations, presentations, brainstorming sessions, conferences with remote workers, or any number of other collaborations.
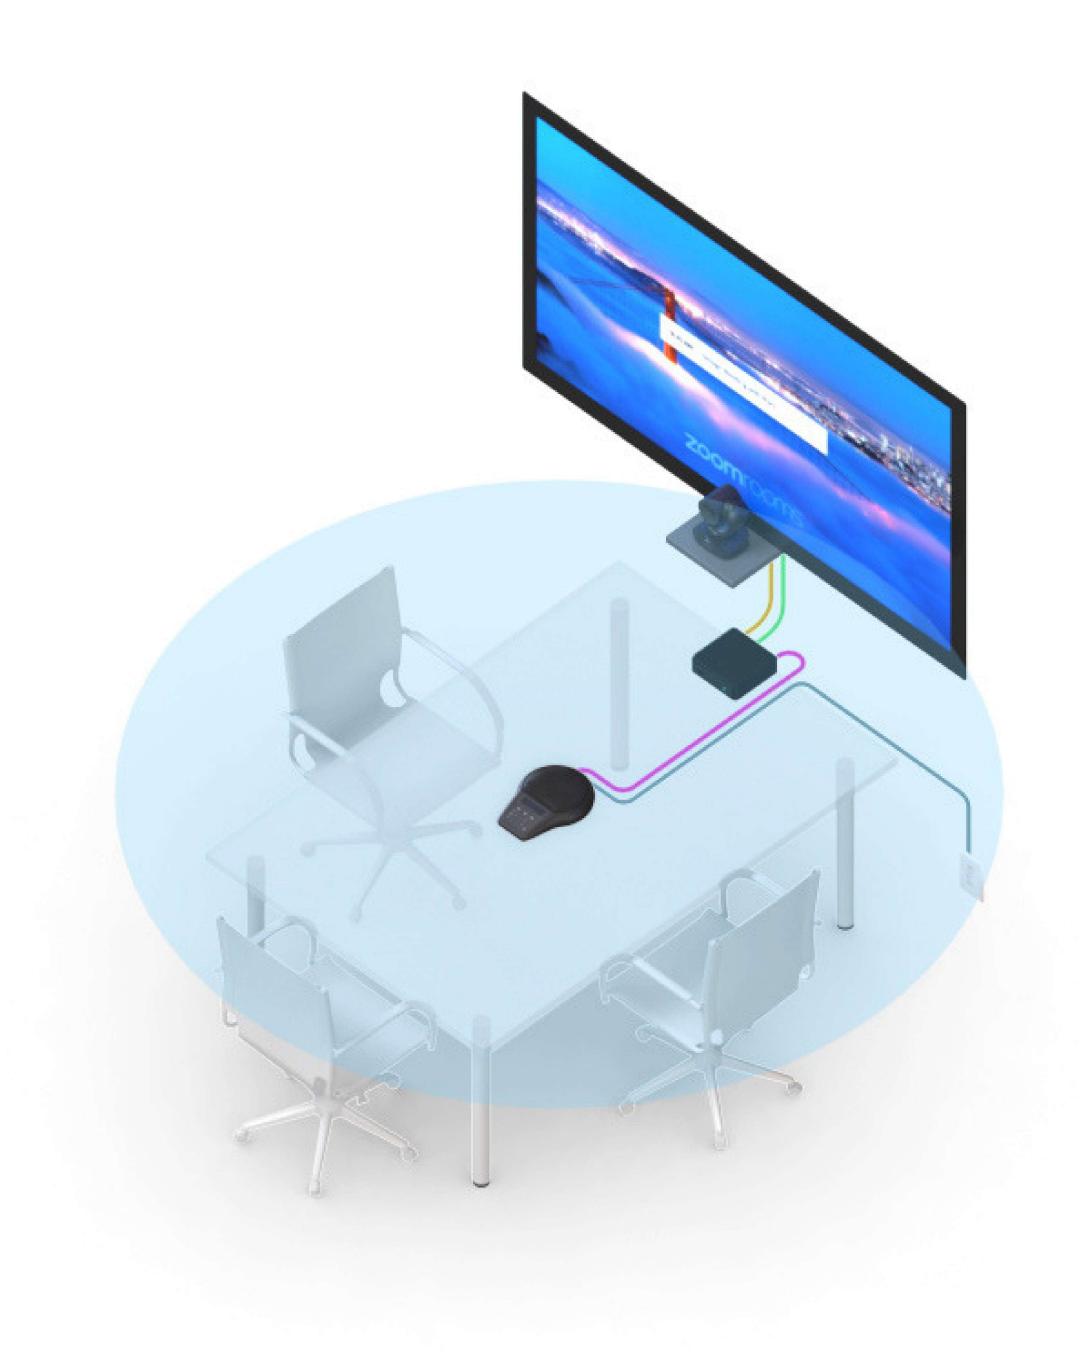

*Other variations of the Spider Speakerphone includes the MT502 USB/PSTN and the MT503 USB/Analog
