

Room Profile

Lounge

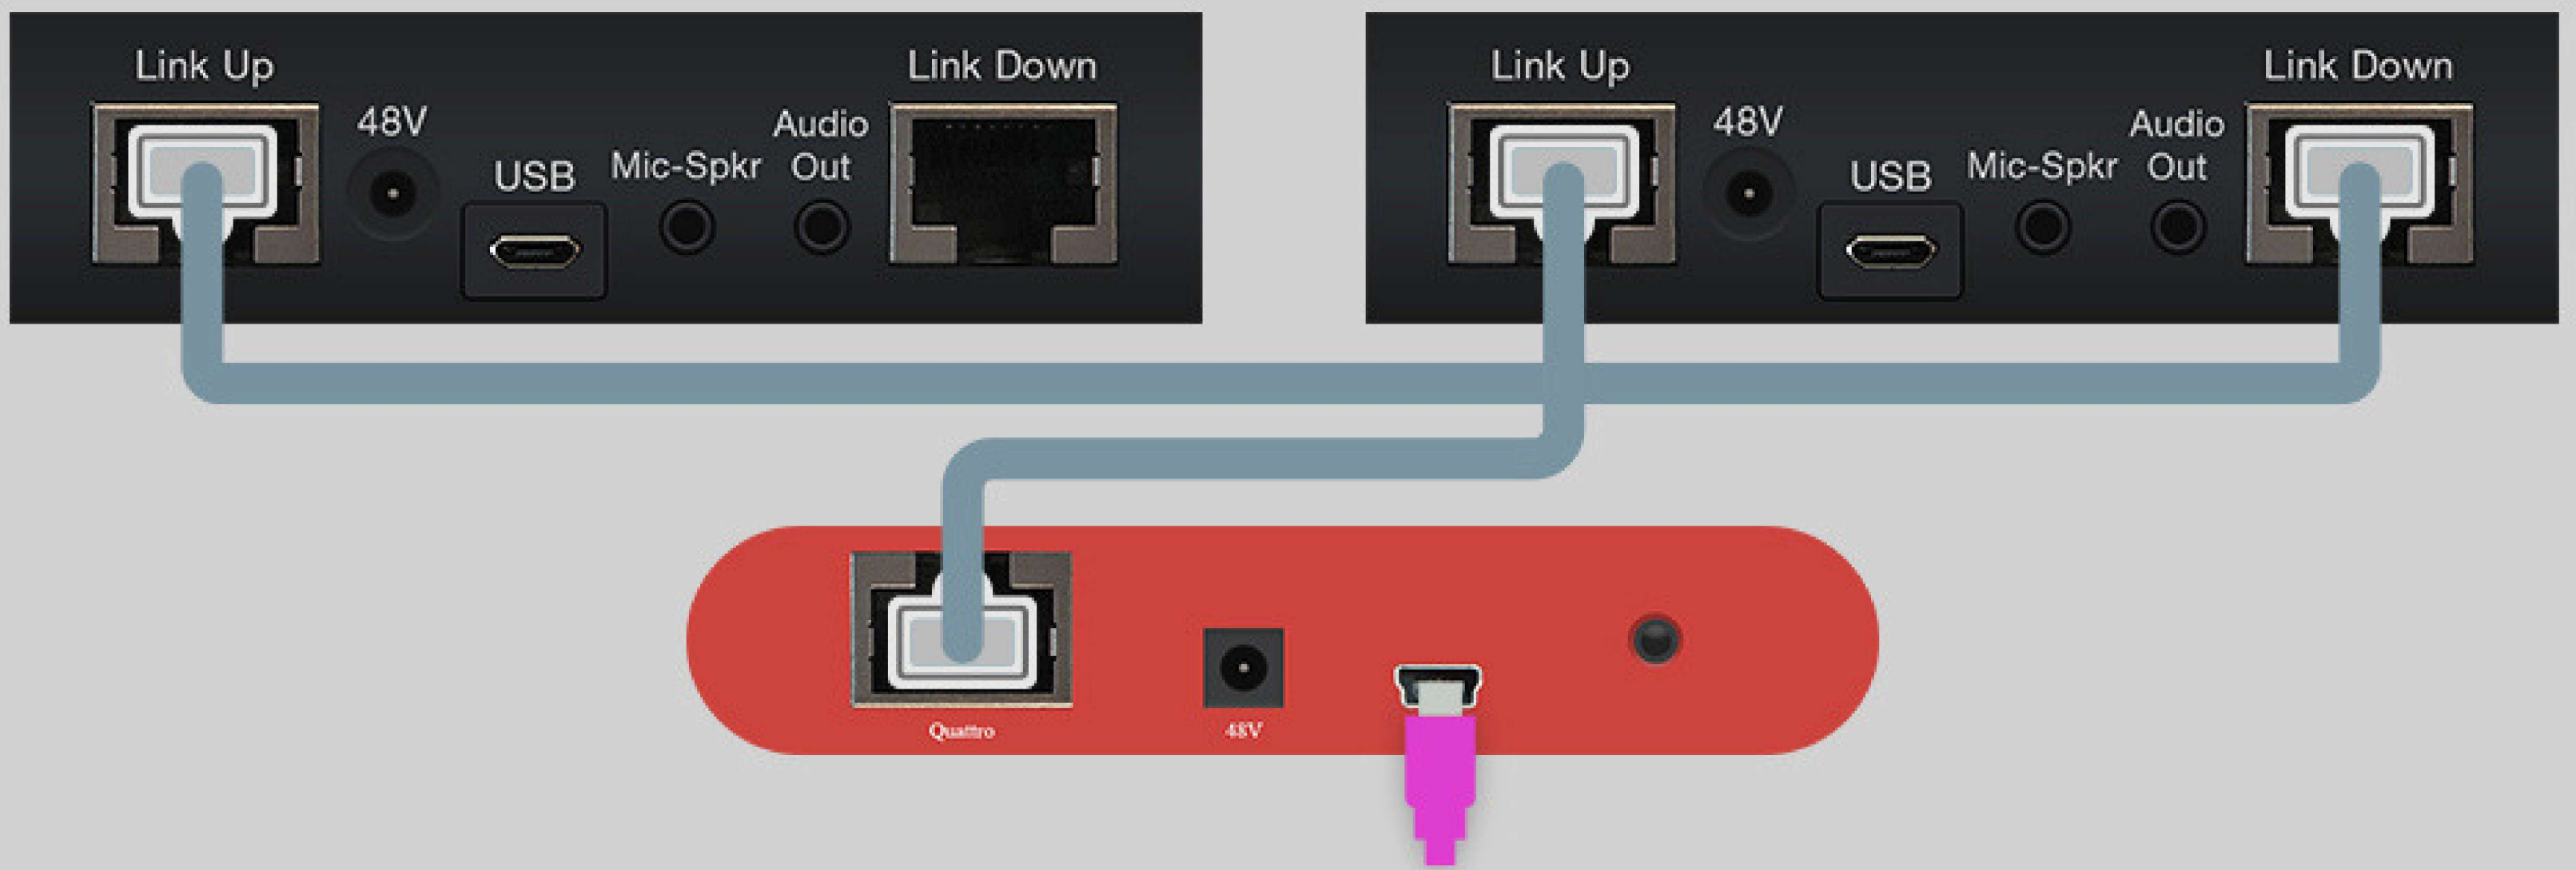

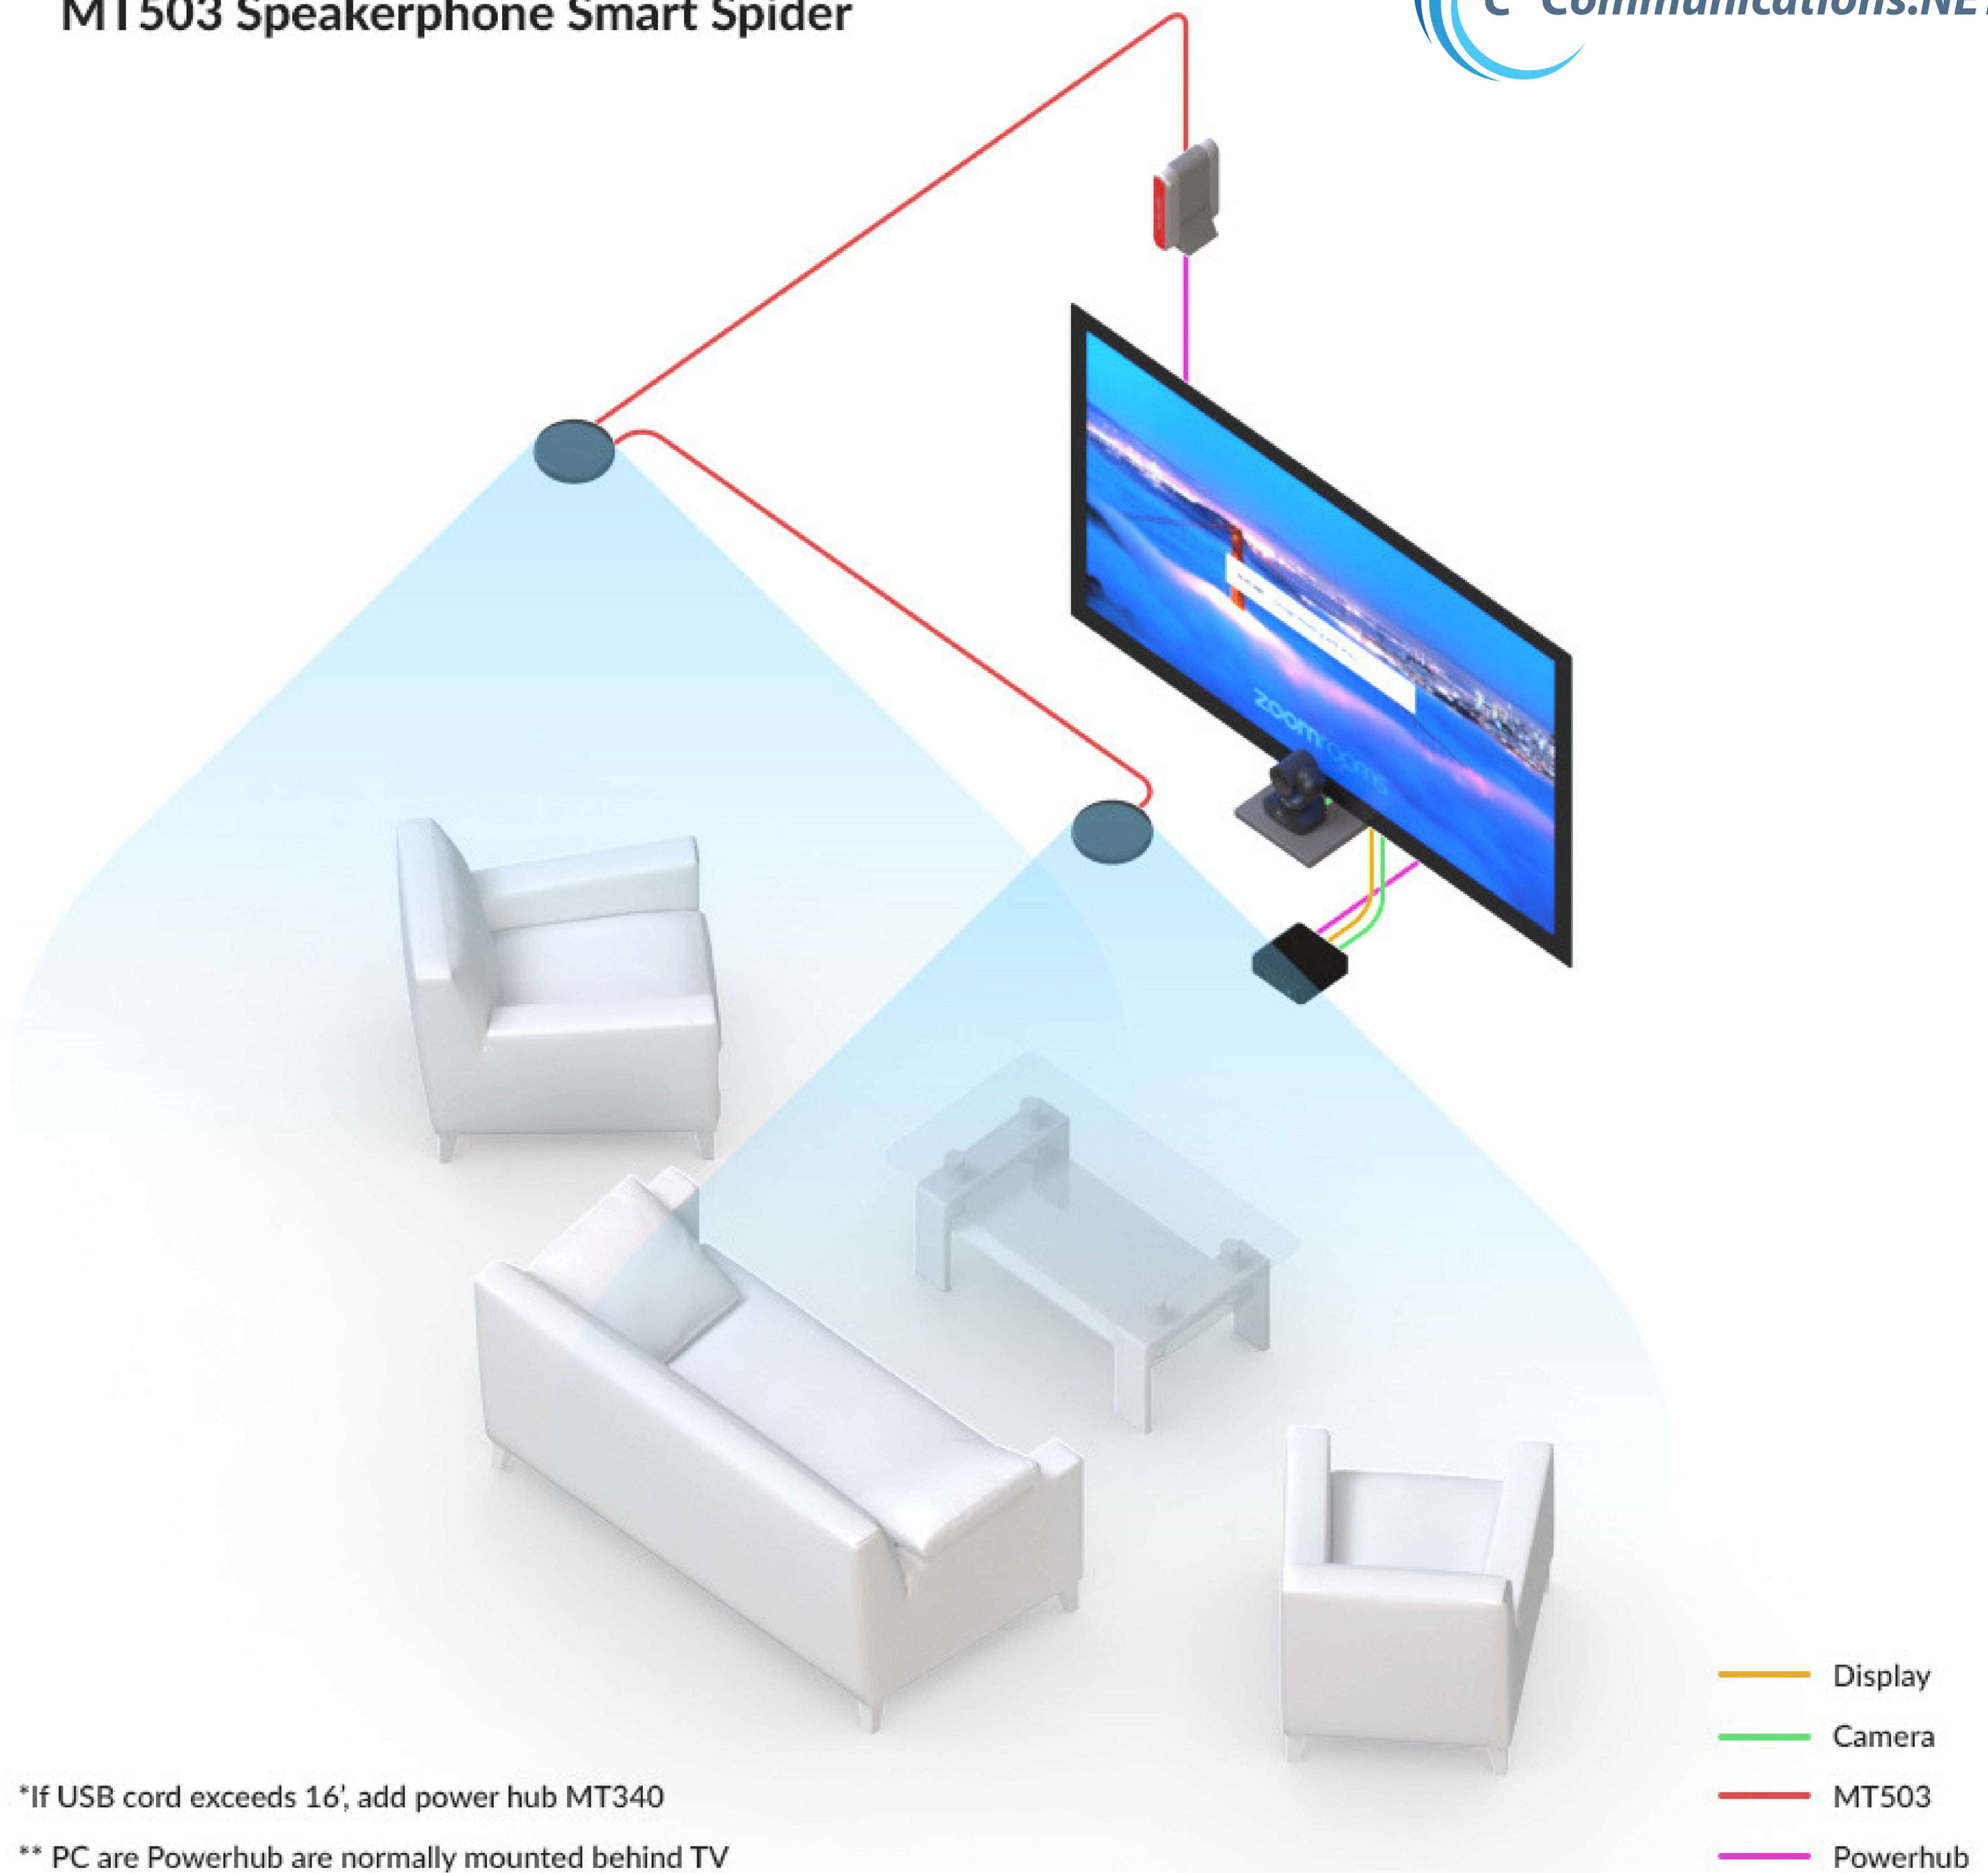

Similar to Huddle Room in size, a lounge is a more relaxed meeting space, typically with couches and even without a table. They typically can seat around 3-5 people. Ceiling or wall mounted products are important for rooms such as these, so we recommend the Spider or Condor.

In the first rendering, we created a room that seats 4 people and utilizes two **MT503 Smart Spider USB/Analog Speakerphones** mounted on the ceiling. The Smart Spider is both a microphone and a speaker, creating an all-in-one audio device.

In the second rendering, the room equips a **MT600 Condor Microphone Array** and a soundbar.

MT503 Speakerphone Smart Spider

MT600 Condor Microphone Array

- Condor
- Soundbar
- Display
- Camera

*PC normally mounted behind monitor
